# Seeknit Products Catalog

Kinki Amibari Co. Ltd.

# Seeknit

To celebrate our 100th anniversary,  
we launched a new brand called Seeknit to help you  
seek and explore your own world of knitting.

Through our products and various activities,  
we thought that we could bring knitting closer to you.

Kinki Amibari will continue to contribute to and  
promote the ongoing culture of knitting.

*Seeknit*

*founded in 1916*

## Sustainability

Bamboo has remained the preferred choice over the years due to its natural and environmentally friendly qualities.

## Airy

Seeknit bamboo needles offer exceptional comfort with a smooth and polished surface that provides an airy feel for all knitting projects.

## Useful

Finely ground needle points and carefully polished surfaces, crafted by our highly skilled artisans, make it easy to pick up stitches.

## Comfortable

Designed to fit comfortably in your hand, our needles are lightweight and flexible. We are confident that you will appreciate the quality craftsmanship reflected in our perfectly polished needles.

## Made by skilled craftsmen

Bamboo is different in nature, depending on where it is grown, the season, and the variety. For this reason, only skilled craftsmen who have the flexibility to work with these properties are able to manufacture stable quality bamboo knitting needles.

In 2016, Kinki Amibari celebrated its 100th anniversary. Over these years, we have devoted ourselves to making the best use of our accumulated skills and expertise to improve the quality of our products and to develop easier-to-use knitting needles.

We developed the asymmetric circular needle that makes it easier to work small diameters and the circular needle that prevents the cord from twisting. These are just two examples of how our products came to life based on careful examination of ideas and repetition of trial and error.

Our product line that includes not only variation, but also innovative ideas such as the asymmetric needles or rotating joints is a direct reflection of our history of development.

## Koshitsu is the bamboo needle with brown color.

"Koshitsu" is a product that has achieved a smooth surface and long lasting durability through special treatment with "high temperature, high-pressure and with natural plant wax" developed by our company based on our vast experience over 100 years of history.

It is characterized by density of the needles, the glossy surface, and the slippery feel. And above all, it is our original feature that no other company offers.

*K o s h i t s u*

## Shirotake is the bamboo needle with natural color.

"Shirotake" is a bamboo knitting needle that allows you to enjoy the natural texture of bamboo.

It is softer than our "Koshitsu" knitting needles, so you can enjoy the natural resilience of bamboo.

The carefully polished surface and needletips are smooth and provide comfortability in knitting.

*S h i r o t a k e*

Point  
**01** | Finely buffed

The finely buffed needle tip makes it easier to pick up stitches.

Point  
**02** | Carefully polished

The carefully polished surface is soft to the touch and the yarn slides off easily.

Point  
**03** | Laser-print

The size is laser-printed so it won't rub off.

Point  
**04** | Rotating cord

Seeknit knitting needles adopt a rotating cord to prevent the cord from twisting.

# 01 | Seeknit CURVE

With a beautiful and flowing shape

In our pursuit of a more comfortable knitting experience, we have developed interchangeable circular needles with a beautiful, flowing shape. The new interchangeable circular needles allow the yarn to glide smoothly, giving you the pleasure of knitting exactly as you want. This needle may be the last one you'll ever need .

## 3 Seamless Features to Achieve Smoothness

- 1, The connection between the bamboo needles and the stainless steel fitting is seamless.
- 2, The Japanese-made stainless steel metal fitting features precision screws for seamless connections.
- 3, The cord connects seamlessly to the fittings and includes a swivel function.

# Interchangeable circular needles connectivity

## 2 Screw Sizes

M1.8 and M2 size screws are used for needle tips and cords. You can directly connect the needle tip and cord with screws of the same size.

M1.8	
mm	US
2.00 mm	US0
2.25 mm	US1
2.50 mm	US1.5
2.75 mm	US2
3.00 mm	US2.5

M2			
mm	US	mm	US
3.50 mm	US4	6.00 mm	US10
3.75 mm	US5	6.50 mm	US10.5
4.00 mm	US6	7.00 mm	US10.75
4.50 mm	US7	8.00 mm	US11
5.00 mm	US8	9.00 mm	US13
5.50 mm	US9	10.00mm	US15

## Simplified with Two Screw Sizes

Two screw sizes, M1.8 and M2, simplify the selection of needles, cords, joints, and stoppers. The screws can be easily and securely tightened by hand.

## Can be used in combination with existing products

Needles, cords, joints, and stoppers of sizes M1.8 and M2 can be used in combination with existing interchangeable circular needles.

M4 needles can be used in combination with a converter. Existing M4 cords cannot be used.

When using existing M2 stoppers with Seeknit Curve large size needles, be careful not to slip off the stitches.

## Easy Maintenance with Stainless Steel Material

Durable stainless steel for easy maintenance.

## Comfortable Knitting with a Flexible Yet Strong Cord

The use of durable and flexible nylon cord enhances your knitting experience.

Cord memory problems have also been significantly improved.

The swivel feature helps to keep the needle firmly in place and prevents knitting from twisting.

## Customize it for your projects

The ability to make circular needles that cannot be found in ready-made products makes it possible to apply them to a wide variety of knitting projects.

## Points to Consider When Selecting

### Seeknit CURVE Interchangeable Circular Needle and Cord length

The total length of the two interchangeable needle tips must be less than the cord length.

If the total length of the two interchangeable circular needle tips exceeds the length of the cord, it cannot be used as a circular needle.

#### Needle length 6 cm / 2.4 inch:

The cord length **longer than 12 cm / 4.8 inch** is required.

#### Needle length 10 cm / 4 inch

The cord length **longer than 20 cm / 8 inch** is required.

#### Needle length 12.5 cm / 5 inch

The cord length **longer than 25 cm / 10 inch** is required.

#### Needle length 15cm / 6 inch

The cord length **longer than 30cm / 12 inch** is required.

If the cord is too short,  
it will be too tight to knit.

## 02 | Interchangeable Circular Needles

Our numbers of Bamboo Interchangeable Circular Needle are available with a wide selection of needle lengths, sizes, and cable lengths, making many combinations possible. You can customize your original set by yourself as you like. All our circular needles feature a rotating swivel cord that prevents from twisting, so you can enjoy knitting comfortably.

Interchangeable Circular Needles are products that allow you to mix and match cord joints, Joint converters, stoppers and other parts or to customize circular needles sizes and shapes as you like.

Interchangeable Circular needles with short cords can be used for small projects such as mittens, socks, sleeves, baby hats, wrist warmers, and leg warmers.

# Interchangeable circular needles connectivity

## 3 screw sizes

M1.8, M2, and M4 size screws are used for the needle tips and cords. You can directly connect the needle tip and the cord with screws of the same size.

Point to note

## Selecting a interchangeable circular needle and cord length:

### 5cm / 2inch:

The cord length **longer than 10cm** is required.

### 10cm / 4inch:

The cord length **longer than 20cm** is required.

### 12.5cm / 5inch:

The cord length **longer than 25cm** is required.

### 14cm / 5.5inch:

The cord length **longer than 28cm** is required.

If the cord is too short, it will be too tight to knit.

## 03 | Asymmetric Circular Needles

The asymmetric circular needle is a Seeknit original product

The asymmetric circular needle is a Seeknit original product developed in 2010 to make knitting small diameter tubes such as socks comfortably. One of the needles is just one centimeter shorter than the other and that makes a big difference in smoothness and comfort.

Our exclusive original 23cm Asymmetric Circular Needles were developed for use with sock yarn, and are available in diameters from 2.00mm to 6.00mm.

Asymmetric Circular Needles have a short needle and a long needle. Put the stitches on the short needle and work through with the long needle. Since the moving needle is longer it is easier to hold, making these suited for small circular projects such as socks.

## 04 | Circular Needles

All of our circular needles feature a flexible rotating joint that prevents twisting, allowing for smooth knitting. Circular needles will save time on tube knitting projects compared to using straight needles. All our circular needles feature a rotating swivel cord that prevents from twisting, so you can enjoy knitting comfortably.

Circular needles can be used for all tube knitting projects such as sweaters and hats, and for other non-circular projects such as shawls.

Circular needles with short cords can be used for small projects such as mittens, socks, sleeves, baby hats, wrist warmers, and leg warmers.

## Flex Single Pointed Needle

50cm(19.5") Set of 2

Use the Flex Single pointed needles 50cm(19.5") for large projects.

The flexible rotating joint prevents twisting, allowing for smooth knitting.

Use this Flex single pointed needle to knit sweaters, scarves and cushion covers.

## 06 | Double Pointed Needles

We offer double pointed needles from 10 cm, 15cm and 20cm. You will experience the suppleness of the bamboo knitting needles, you can enjoy the natural bounce of bamboo, carefully polished surface and needle tips are smooth, the glossy surface and the slippery feel.

Double pointed needles that can make small circles are ideal for knitting small items. Attach a rubber cap to one end to use as a single pointed needles as well.

Use the 10cm and 15cm needles for small circular projects such as mittens, socks, gloves, sleeve and leg warmers.

Use the 20cm needles for large circular projects such as sweaters, hats, neck warmers, and cowls.

A wide selection of Double Pointed Needles Sets with various sizes are also available. (see page 20)

# How to care for Seeknit Bamboo Needles

## 1. Carnauba wax recommended

With prolonged use, the surface of the bamboo may deteriorate and the slippage of the yarn may worsen. We recommend applying carnauba wax. Place the needle on a flat surface, hold the solid carnauba wax in your hand, rub the surface of the needle with the wax and polish with a dry cloth. This will improve the smoothness of the yarn and the luster of the bamboo.

## 2. How to deal with discolored brass metal parts

Circular needles and interchangeable circular needles have brass metal fittings that may become discolored over time. If this occurs, soak a cloth with a commercially available penetrating lubricant (e.g., WD-40) and wipe the metal fittings. Be careful not to allow the lubricant to adhere to the bamboo pins. If it does, wipe it off immediately with a cloth.

## 3. The dye on the yarn has been transferred on the needle

We recommend using the needles as they are. But if you want to remove the color, we would like to inform you how to remove the color on the needle when the color on the yarn sticks to the needle as follows: If the transfer is light (just on the surface of the bamboo needle), we recommend wiping with a little alcohol. But in this case the varnish on the surface will peel off or the bamboo will get soaked, making the surface of the needles dull and rough. In this case, apply solid wax (such as carnauba wax or candle wax) and polish with a dry cloth. This will improve the slipperiness of the needles and the luster of the bamboo. In any case, the dye that has been transferred to the needle cannot be completely removed. Therefore we recommend to use the needles as they are.

## Precautions for use

### 1. Use and Storage Precautions

Since this product is made of natural bamboo, please do not wet it with water or expose it to steam. When wet, the surface fibers of the bamboo needles become frayed and less slippery. To prevent mold, wipe with a dry cloth after use.

### 2. Handle gently

Bamboo knitting needles are made of natural material, so if you use excessive force, the needle may break, causing scratches or dents. If you hold the needle too tightly while knitting, the needle may break, such as when the stitches are tight. Do not use excessive force and handle the needle gently.

### 3. Every bamboo has different color

Since bamboo knitting needles are made of natural materials, the fiber, color, and texture are different for each one. Koshitsu bamboo needles treated with high temperature and high pressure have different colors ranging from light to dark brown. In addition, the color may change with the years of use.

### 4. Laser engraving

The size for each bamboo knitting needle is laser engraved. The bamboo has a hard outer part and a soft inner part. In addition, because the density and hardness of the fibers vary from bamboo to bamboo, there are differences in the depth and color of the engraving.

# Seeknit Needles Sets Catalogs

## Seeknit CURVE

Seeknit CURVE sets are available. Please refer to our separate catalog.
